

KENDA
TIRES

KENDA

Alluvium

black / black - brown

(Art. 521760/6 - 700 x 40C)

(Art. 521761/5 - 700 x 45C)

ALLUVIUM – FÜR SPASS AM GRAVELN, IMMER UND ÜBERALL!

Kenda Gravelreifen sind der ultimative Begleiter für alle, die gerne abseits der ausgetretenen Pfade unterwegs sind. Bestes Beispiel ist der neue Alluvium, der leichtes Rollen auf befestigten Straßen und sicheren Grip auf Schotter und Waldwegen bietet. Fahrspaß ist damit in allen Situationen garantiert.

ALLUVIUM – FOR GRAVEL FUN, ALWAYS AND EVERYWHERE!

Kenda gravel tires are the ultimate companion for anyone who likes to venture off the beaten track. The best example is the new Alluvium, which offers easy rolling on paved roads and secure grip on gravel and forest paths. Riding fun is guaranteed in all situations.

DRIVEN TO BUILD BETTER TIRES

Kenda spielt mittlerweile im Konzert der ganz Großen mit. In zahlreichen Weltcups verschiedenster Bike-Disziplinen fahren Top-Athleten, wie z.B. das Ausnahmetalent und 5-facher Worldcupgesamtsieger Aaron Gwin. Ohne bestes Reifenmaterial wäre das nicht möglich gewesen.

Kenda now plays in the concert of the greats. In numerous World Cups of different bike disciplines there are top athletes, such as the exceptional talent and 5-time World Cup winner Aaron Gwin. Without the best tire material that would not have been possible.

Pinner Pro ATC
(Art. 521996/98)

Pinner Pro AGC
(Art. 521997/99)

PINNER – PIN ES WIE GWIN!

Der Pinner wurde exklusiv in Zusammenarbeit mit Aaron Gwin entwickelt und liebt es, auf trockenen und staubigen Strecken losgelassen zu werden. Zeigen Sie es allen, gehen Sie es schnell an, dann wissen Sie genau, wo die Grenzen liegen.

PINNER – PIN IT LIKE GWIN!

Exclusively developed in cooperation with Aaron Gwin, the Pinner loves to be let loose on dry and dusty tracks. Point it down, let it go fast, and know exactly where the limits are.

(Fast) E-Mountain Bikes, Trails and rough terrains

Robuste Karkasse und Offroad-Mischung, speziell für Elektro-Mountainbikes entwickelt. ECE-R75 zertifiziert. Tubeless Ready.

Robust casing and offroad compound specifically developed for electric mountainbikes. ECE-R75 certified. Tubeless Ready.

GUMMIMISCHUNGEN

RUBBER COMPOUNDS

R3C (= DTC für Road und MTB) Gummimischung mit sehr niedrigem Rollwiderstand, greift auch in Kurven (besonders geeignet bei Nässe) und kann sowohl für Rennräder als auch für Mountainbikes genutzt werden. Schnell und leicht - dies ist keine Alltagsmischung.

R3C (= DTC for road and MTB) Super low rolling resistance rubber, that also grips in corners (especially suitable in wet conditions) and can be used on racing bikes as well as mountain bikes. Fast and light - this isn't your daily commuter compound.

R2C (= DTC für Rennräder) Zwei-Komponenten-Mischung für die Straße mit härterem Mittelbereich und weicheren Flanken. R2C-Reifen eignen sich für die ganzjährige Verwendung, auch bei nassen Straßen.

R2C (= DTC for racing bikes) Road double compound with harder center area and softer rubber at the sides. R2C tires are usable for all season usage, also on wet streets.

L3R und **L3R Pro** High-Tech Gummimischung, um "den besten Kompromiss zwischen Leichtgewicht, Langlebigkeit und Rollwiderstand" zu erreichen.

L3R and **L3R Pro** high performance rubber compounds for extending longevity, lightweight and rolling resistance.

EN-DTC (= Enduro Dual Tread Compound) kombiniert die Mischung aus 55/62/55 ShA für hohen Grip auf der Lauffläche und einen besseren Rollwiderstand als andere DTC Mischungen.

EN-DTC (= Enduro Dual Tread Compound) combines rubber compounds 55/62/55 ShA for high traction of the tread and less rolling resistance than other DTC compounds.

Stick-E COMPOUND Weiche "50 ShA Gummimischung" mit sehr langsamem "Rebound-Effekt". Dadurch klebt der Reifen fast am Untergrund, was eine super Traktion beim Beschleunigen, in Kurven und beim Bremsen bewirkt.

Stick-E COMPOUND A slow rebound rubber (50 ShA durometer) for grip and traction control. The slow rebound rubber conforms to the trail, rock or roots surface instead of bouncing off it.

RSR (= Race Stick-E Rubber) Grip in Rennsituationen in einer neuen Dimension und extrem weich und griffig für eine Vielzahl von Oberflächen und Bedingungen. Das weiche Material bietet nicht nur überlegenen Grip, sondern auch zusätzlichen Federungskomfort, da sich jeder Stollen verbiegt und der Trailoberfläche anpasst.

RSR (= Race Stick-E Rubber) is a compound that takes grip to a whole new level. The RSR is super soft and sticky for a variety of surface types and conditions. The soft compound provides not only superior grip, but also works as a small degree of independent suspension as each tire knob flexes and reform on the trail surface.

ZUSÄTZLICHE EIGENSCHAFTEN

ADDITIONAL FEATURES

RHP (= Reflective Hot Patch) an der Seite des Reifens für bessere Sichtbarkeit in der Dämmerung, Abendstunden oder bei schlechten Wetterverhältnissen stellt sicher, dass Radfahrer besser im Straßenverkehr gesehen werden. Das Reflective Hot Patch ist ein wichtiger Zusatz für die Sicherheit des Fahrers.

RHP (= Reflective Hot Patch) on the tire's side for better visibility in dawn, dusk, evening hours or bad weather conditions, making sure that cyclists are more visible in traffic. The Reflective Hot Patch is an important addition for the rider's safety.

E-BIKE GEEIGNET Durch eine Verstärkungseinlage erfüllen die Reifen auch die erhöhten Anforderungen von E-Bikes.

E-BIKE APPROVED A reinforcement layer makes the tires meet the higher requirements for E-bikes.

E-50 weist darauf hin, dass der Reifen ECE-R75 zertifiziert ist und auch für E-Bikes mit 50 km/h Maximalgeschwindigkeit genehmigt ist.

E-50 Indicates that the tire is ECE-R75 certified and therefore approved for use on e-bikes with maximum speed of 50 km/h.
