

KENDA
TIRES

DRIVEN TO BUILD BETTER TIRES

FOR THE USE WITHOUT THE INNER TUBE IT IS MANDATORY TO FOLLOW INSTRUCTIONS ON WWW.FULCRUMWHEELS.COM/2-WAY-FIT-READY

Gran Mudda AGC
(Art. 521986 - 29x2.4")

Gran Mudda AGC
(Art. 521984 - 27.5x2.4")

GRAN MUDDA – DER NAME IST PROGRAMM!

Zeit sich schmutzig zu machen! Kendas brandneuer Schlammreifen, der Gran Mudda Pro, ist in seinem Element, wenn aus Schmutz Schlamm wird. Hohe und stachelige Profilblöcke beißen in den Boden und bieten super vorhersehbare Brems- und Kurvenunterstützung. Mit seiner Advanced Gravity Casing (AGC) Karkasse konnte Tracey Hannah bereits 2019 den UCI Weltcup in Les Gets (F) gewinnen.

GRAN MUDDA – THE NAME IS PROGRAM!

Time to get dirty! Kenda's brand new mud tire, the Gran Mudda Pro, is in its element when dirt turns into mud. High and spiky tread blocks bite into the ground and provide super predictable braking and cornering support. With his Advanced Gravity Casing (AGC) casing, Tracey Hannah was able to win the UCI World Cup in Les Gets (F) in 2019.

Kenda spielt mittlerweile im Konzert der ganz Großen mit. In zahlreichen Weltcups verschiedenster Bike-Disziplinen sind Top-Athleten, wie z.B. das Ausnahmetalent und 5-facher Worldcupgesamtsieger Aaron Gwin. Ohne bestes Reifenmaterial wäre das nicht möglich gewesen.

Kenda now plays in the concert of the greats. In numerous World Cups of different bike disciplines there are top athletes, such as the exceptional talent and 5-time World Cup winner Aaron Gwin. Without the best tire material that would not have been possible.

Pinner Pro ATC
(Art. 521996/98)

Pinner Pro AGC
(Art. 521997/99)

PINNER – PIN ES WIE GWIN!

Der Pinner wurde exklusiv in Zusammenarbeit mit Aaron Gwin entwickelt und liebt es, auf trockenen und staubigen Strecken losgelassen zu werden. Zeigen Sie es allen, gehen Sie es schnell an, dann wissen Sie genau, wo die Grenzen liegen.

PINNER – PIN IT LIKE GWIN!

Exclusively developed in cooperation with Aaron Gwin, the Pinner loves to be let loose on dry and dusty tracks. Point it down, let it go fast, and know exactly where the limits are.

PANNENSCHUTZ

PUNCTURE PROTECTION

RENNRAD / CX / TREKKING

ROAD / CX / TREKKING

GRAVEL CASING TECHNOLOGY **GCT**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●○○

SCT Material wird von Wulstkern zu Wulstkern gelegt, um vor Schnitten und Pannen zu schützen und erleichtert den Umbau auf Tubeless.

SCT material wraps around the tire from bead to bead, protecting it from cuts and punctures, and allowing easy tubeless conversion.

Gravity

K-ARMOR **KA**

Pannenschutz Seitenwand
Sidewall Cut Protection ●○○○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Urheberrechtlich geschütztes, von Kenda entwickeltes und sehr leichtes Pannenschutz-Material. Erhöht die Durchstoßfestigkeit um 174 % zu üblichen Aramid-Einlagen.

Proprietary lightweight puncture breaker material developed by Kenda. Increases the puncture resistance by 174 % over traditional Aramid breakers.

Road

IRON CAP BELT **ICP**

Pannenschutz Seitenwand
Sidewall Cut Protection ●○○○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Eine Lage gewebtes Material, das direkt unter der Lauffläche liegt. So wird zusätzlicher Pannenschutz bei minimalem Mehrgewicht erreicht.

A layer of woven material that runs directly under the tread area. Therefore offering additional puncture protection at a minimum weight.

Road

TUBELESS READY CASING **TLR**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●○○

Das SCT Material liegt um den kompletten Reifen für extra Pannenschutz. Zusätzlich wird der Wulstkern für mehr Luftdichtigkeit modifiziert.

The SCT material is layed all around the tire for extra puncture protection. Additionally, the bead is modified to create a tight air seal.

Road

K-SHIELD + **KS+**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●○○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Eine 5 mm Coextrusion eines Gummi-Elastomers. Höchstes Pannenschutz-niveau für vielseitigen Einsatz und hohe Fahrqualität.

A 5 mm subtreed coextrusion of a rubber elastomer. Highest puncture protection level for versatile use and a great ride quality.

Trekking, City, Commuting

K-SHIELD **KS**

Pannenschutz Seitenwand
Sidewall Cut Protection ●○○○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●○○

Eine Schicht einer leichten flexiblen Gummi-Aramid-Mischung mit keramischen Einschlüssen. Entwickelt, um Einsteiche zu vermeiden und die Lebensdauer des Reifens zu erhöhen.

A layer of light, flexible rubber containing aramid and ceramic particles for increased puncture resistance. Designed to prevent punctures and increase tire life.

Trekking, City, Commuting

MTB

MTB

TUBELESS RACE **TR**

Pannenschutz Seitenwand
Sidewall Cut Protection ●○○○○

Pannenschutz Lauffläche
Tread Puncture Protection ●○○○○

Die leichteste XC Karkasse, die Kenda anbietet. Schnell rollend und tubeless ready.

The lightest XC casing option Kenda offers. Fast rolling and tubeless ready.

MTB

ADVANCED GRAVITY CASING **AGC**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●●○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Entwickelt für raue DH-Bedingungen auf Weltcup-Niveau. Kugelsichere Karkasse mit höchstmöglichem Schutz. Super griffige Mischung. Tubeless Ready.

Developed for rough DH conditions on World Cup level. Bullet proof casing with the highest possible protection. Super tacky compound. Tubeless Ready.

DH, Freeride, Enduro Race

ADVANCED TRAIL CASING **AEC**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●●○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Robustes Gehäuse mit höchstmöglichem Schutz. Der AEC füllt die Lücke zwischen der Stärke von AGC und dem gewichtsoptimierten ATC.

Robust casing with the highest possible protection level. AEC fills the gap between the burliness of AGC and the weight optimized ATC.

Freeride, Enduro, Enduro Race

ADVANCED TRAIL CASING **ATC**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●○○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●○○

Entwickelt für jede Art von Trails. Kombiniert ein hohes Schutzniveau (Seitenwand und Lauffläche) mit einer griffigen Mischung für den besten Fahrkomfort. Tubeless Ready.

Developed for every kind of trail riding. Combines great protection level (sidewall and subtreed) with grippy compound for the best ride comfort. Tubeless Ready.

All Mountain, Trail

SIDEWALL CASING TECHNOLOGY **SCT**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●○○

Pannenschutz Lauffläche
Tread Puncture Protection ●○○○○

Vielseitige Karkasse mit großer Allround-Leistung, die sowohl einen hohen Seitenschutz als auch gute Rolleigenschaften und geringes Gewicht bietet.

Versatile casing with great all-round performance offering both high protection on sidewalls, a fast rolling compound and low weight.

Marathon, XC, Trail

ELECTRIC MOUNTAIN CASING **EMC**

Pannenschutz Seitenwand
Sidewall Cut Protection ●●●●○

Pannenschutz Lauffläche
Tread Puncture Protection ●●●●○

Robuste Karkasse und Offroad-Mischung, speziell für Elektro-Mountainbikes entwickelt. ECE-R75 zertifiziert. Tubeless Ready.

Robust casing and offroad compound specifically developed for electric mountainbikes. ECE-R75 certified. Tubeless Ready.

(Fast) E-Mountain Bikes, Trails and rough terrains

GUMMIMISCHUNGEN

RUBBER COMPOUNDS

R3C (= DTC für Road und MTB) Gummimischung mit sehr niedrigem Rollwiderstand, greift auch in Kurven (besonders geeignet bei Nässe) und kann sowohl für Rennräder als auch für Mountainbikes genutzt werden. Schnell und leicht - dies ist keine Alltagsmischung.

R3C (= DTC for road and MTB) Super low rolling resistance rubber, that also grips in corners (especially suitable in wet conditions) and can be used on racing bikes as well as mountain bikes. Fast and light - this isn't your daily commuter compound.

R2C (= DTC für Rennräder) Zwei-Komponenten-Mischung für die Straße mit härterem Mittelbereich und weicheren Flanken. R2C-Reifen eignen sich für die ganzjährige Verwendung, auch bei nassen Straßen.

R2C (= DTC for racing bikes) Road double compound with harder center area and softer rubber at the sides. R2C tires are usable for all season usage, also on wet streets.

L3R und **L3R Pro** High-Tech Gummimischung, um "den besten Kompromiss zwischen Leichtgewicht, Langlebigkeit und Rollwiderstand" zu erreichen.

L3R and **L3R Pro** high performance Rubber Compounds for extending longevity, lightweight and rolling resistance.

EN-DTC (= Enduro Dual Tread Compound) kombiniert die Mischung aus 55/62/55 ShA für hohen Grip auf der Lauffläche und einen besseren Rollwiderstand als andere DTC Mischungen.

EN-DTC (= Enduro Dual Tread Compound) combines rubber compounds 55/62/55 ShA for high traction of the tread and less rolling resistance than other DTC compounds.

E-DTC mit einer Mischung von 50/55/50 ShA wurde speziell für den Nevegal X Pro EMC-Version (Art. 528230) entwickelt.

E-DTC with a rubber compound of 50/55/50 ShA has specially been developed for the Nevegal X Pro EMC-Version (art. 528230) .

DH-DTC (= Downhill Dual Tread Compound) DH-DTC verbindet zwei Offroad Gummimischungen zu einer überlegenen Leistungsfähigkeit, für aggressivste Endurostrecken und trotzdem stark genug für Downhillstrecken. Stick-E Mischung in der Mitte, RSR Mischung an den seitlichen Stellen.

DH-DTC (= Downhill Dual Tread Compound) The DH-DTC compound blends two offroad compounds for a superior performance that is suitable for aggressive Enduro courses while still being tough enough for downhills. Stick-E compound down the center, RSR compound across the transition and shoulder knobs.

Stick-E COMPOUND Weiche "50 ShA Gummimischung" mit sehr langsamem "Rebound-Effekt". Dadurch klebt der Reifen fast am Untergrund, was eine super Traktion beim Beschleunigen, in Kurven und beim Bremsen bewirkt.

Stick-E COMPOUND A slow rebound rubber (50 ShA durometer) for grip and traction control. The slow rebound rubber conforms to the trail, rock or roots surface instead of bouncing off it.

RSR (= Race Stick-E Rubber) Grip in Rennsituationen in einer neuen Dimension und extrem weich und griffig für eine Vielzahl von Oberflächen und Bedingungen. Das weiche Material bietet nicht nur überlegenen Grip, sondern auch zusätzlichen Federungskomfort, da sich jeder Stollen verbiegt und der Trailoberfläche anpasst.

RSR (= Race Stick-E Rubber) is a compound that takes grip to a whole new level. The RSR is super soft and sticky for a variety of surface types and conditions. The soft compound provides not only superior grip, but also works as a small degree of independent suspension as each tire knob flexes and reform on the trail surface.

ZUSÄTZLICHE EIGENSCHAFTEN

ADDITIONAL FEATURES

RHP (= Reflective Hot Patch) an der Seite des Reifens für bessere Sichtbarkeit in der Dämmerung, Abendstunden oder bei schlechten Wetterverhältnissen stellt sicher, dass Radfahrer besser im Straßenverkehr gesehen werden. Das Reflective Hot Patch ist ein wichtiger Zusatz für die Sicherheit des Fahrers.

RHP (= Reflective Hot Patch) on the tire's side for better visibility in dawn, dusk, evening hours or bad weather conditions, making sure that cyclists are more visible in traffic. The Reflective Hot Patch is an important addition for the rider's safety.

E-BIKE GEEIGNET Durch eine Verstärkungseinlage erfüllen die Reifen auch die erhöhten Anforderungen von E-Bikes.

E-BIKE APPROVED A reinforcement layer makes the tires meet the higher requirements for E-bikes.

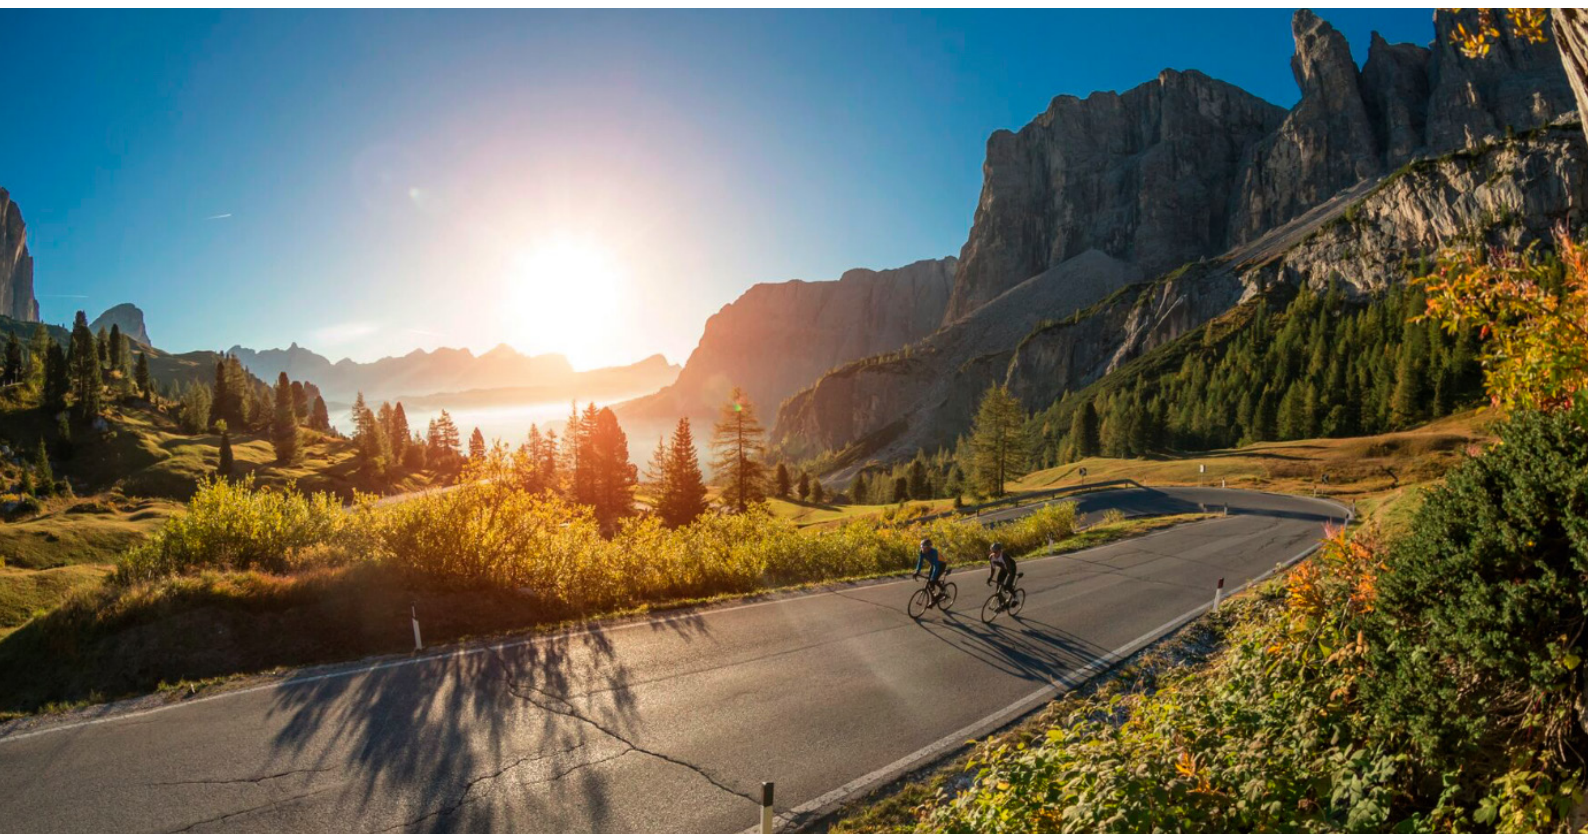

E-50 weist darauf hin, dass der Reifen ECE-R75 zertifiziert ist und auch für E-Bikes mit 50 km/h Maximalgeschwindigkeit genehmigt ist.

E-50 Indicates that the tire is ECE-R75 certified and therefore approved for use on e-bikes with maximum speed of 50 km/h.

SUPER DOMESTIQUE

Der Top-Trainings-/Wettkampfreifen unter den Schlauchreifen! The top training/race tire among the tubular tires!
