

**“UNBELIEVABLE
CORNERING
TRACTION”**
BIKE 06/17

- **Grip and traction**

The Hellkat achieved the highest cornering traction in its category (Enduro Race) with 10/10 points. 9.5/10 points for traction are on par with the Schwalbe Magic Mary SG and slightly exceeding the Maxxis Minion DHF.

- **Protection**

Highest puncture protection in the test with a measured 180 N. Resisted pinch flats falling down from a height up to 1050 mm, same as Schwalbe.

- **Weight**

Competing against folding bead tires, the wire bead version of the Hellkat showed a competitive weight of 1172 g, weighing slightly less than the Maxxis and only 56 g more than the Schwalbe.

- **Price**

The Hellkat was the most affordable tire in its category with a RRP of 52,90 Euro compared to 62,90 Euro for the Schwalbe and 74,50 Euro for the Maxxis.

VERDICT: EXCELLENT

**“ROLLS
EXTREMELY
WELL”**
BIKE 06/17

- **Weight**

Tested with KSCT protection, the Saber was still one of the lightest tires in the test with 610 g.

- **Rolling resistance**

With a tested rolling resistance of 19,9 watt, the Saber with R3C compound was one of the top 3 fastest rolling tires in the test.

VERDICT: VERY GOOD
