

FAHRWERKER //

F//2000

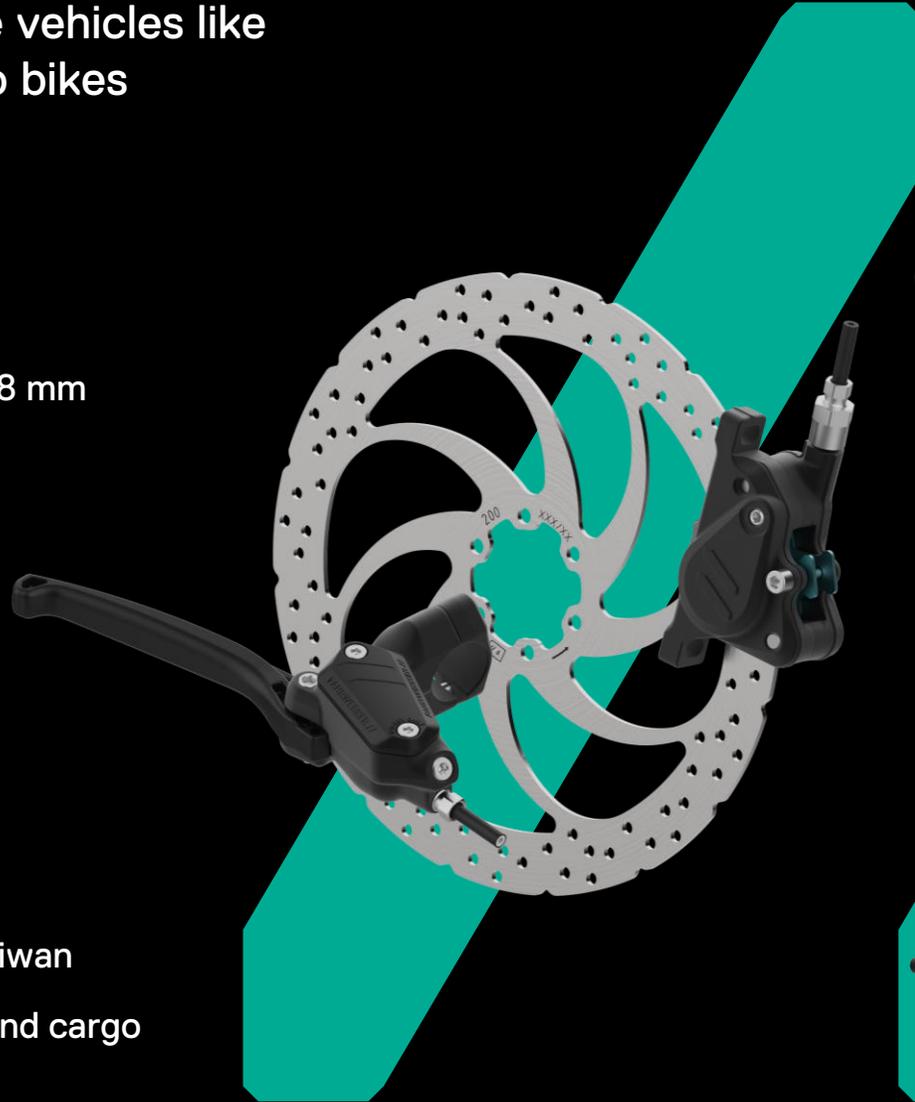

Why F//2000

The Fahrwerker F//2000 is derived from the F//4000 and designed for single-track vehicles primarily used for private purposes with carrying heavy loads. Performance for everyone. Safe, robust and reliable.

F//2000 brake system

Proven power for single lane vehicles like e-bikes City/Trekking, cargo bikes

- Integrated look
- Up to 350kg per caliper
- Forged master body
- Forged caliper body, 2-Piston Ø28 mm
- SBP (patented smart bleed port)
- High durability
- High heat resistance ability
- Easy maintenance
- Quick pad change
- Blubrake ABS compatible
- MO-LEV Mineraloil
- Made in Germany and made in Taiwan
- Target bicycle market mid, high and cargo
- Pricing starting at 129 € per bike

Serial production

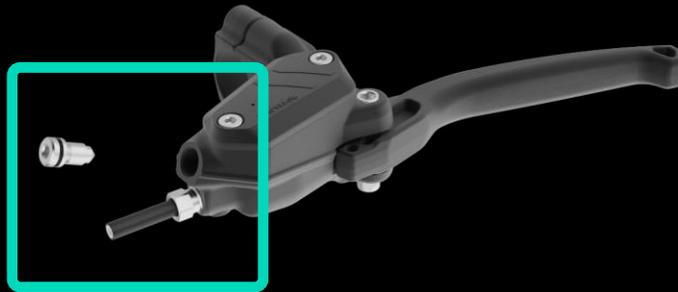

F// Features

Ensure fast maintenance and modularity.

SBP

The patented (EP22802991A) smart bleed port enables Bleeding the system internally.

Pad-stop

The bottom of the caliper is designed to stop the pad from falling through.

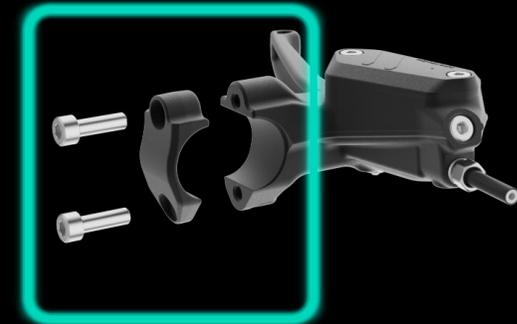

Piston

The piston is designed to resist high heat, with its magnet the pad is hold in place.

2-pieced clamp

More modularity, robust and faster retrofit.

F// Rotor

We deliver individual Rotor interfaces.

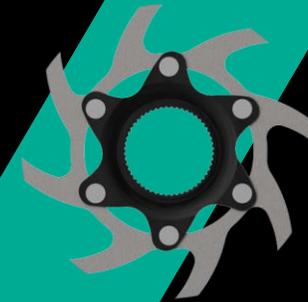

- 20mm hight of friction surface
- 2mm thick
- High durability
- High heat resistance ability
- FEM analyzed
- Standard 6-bolt and individual interface possible
- Made in Taiwan and Made in Germany

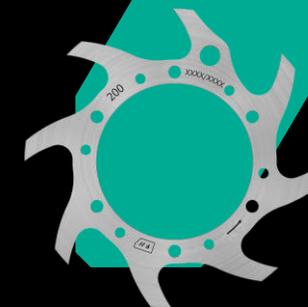

Serial production

4-bolt bc-65mm

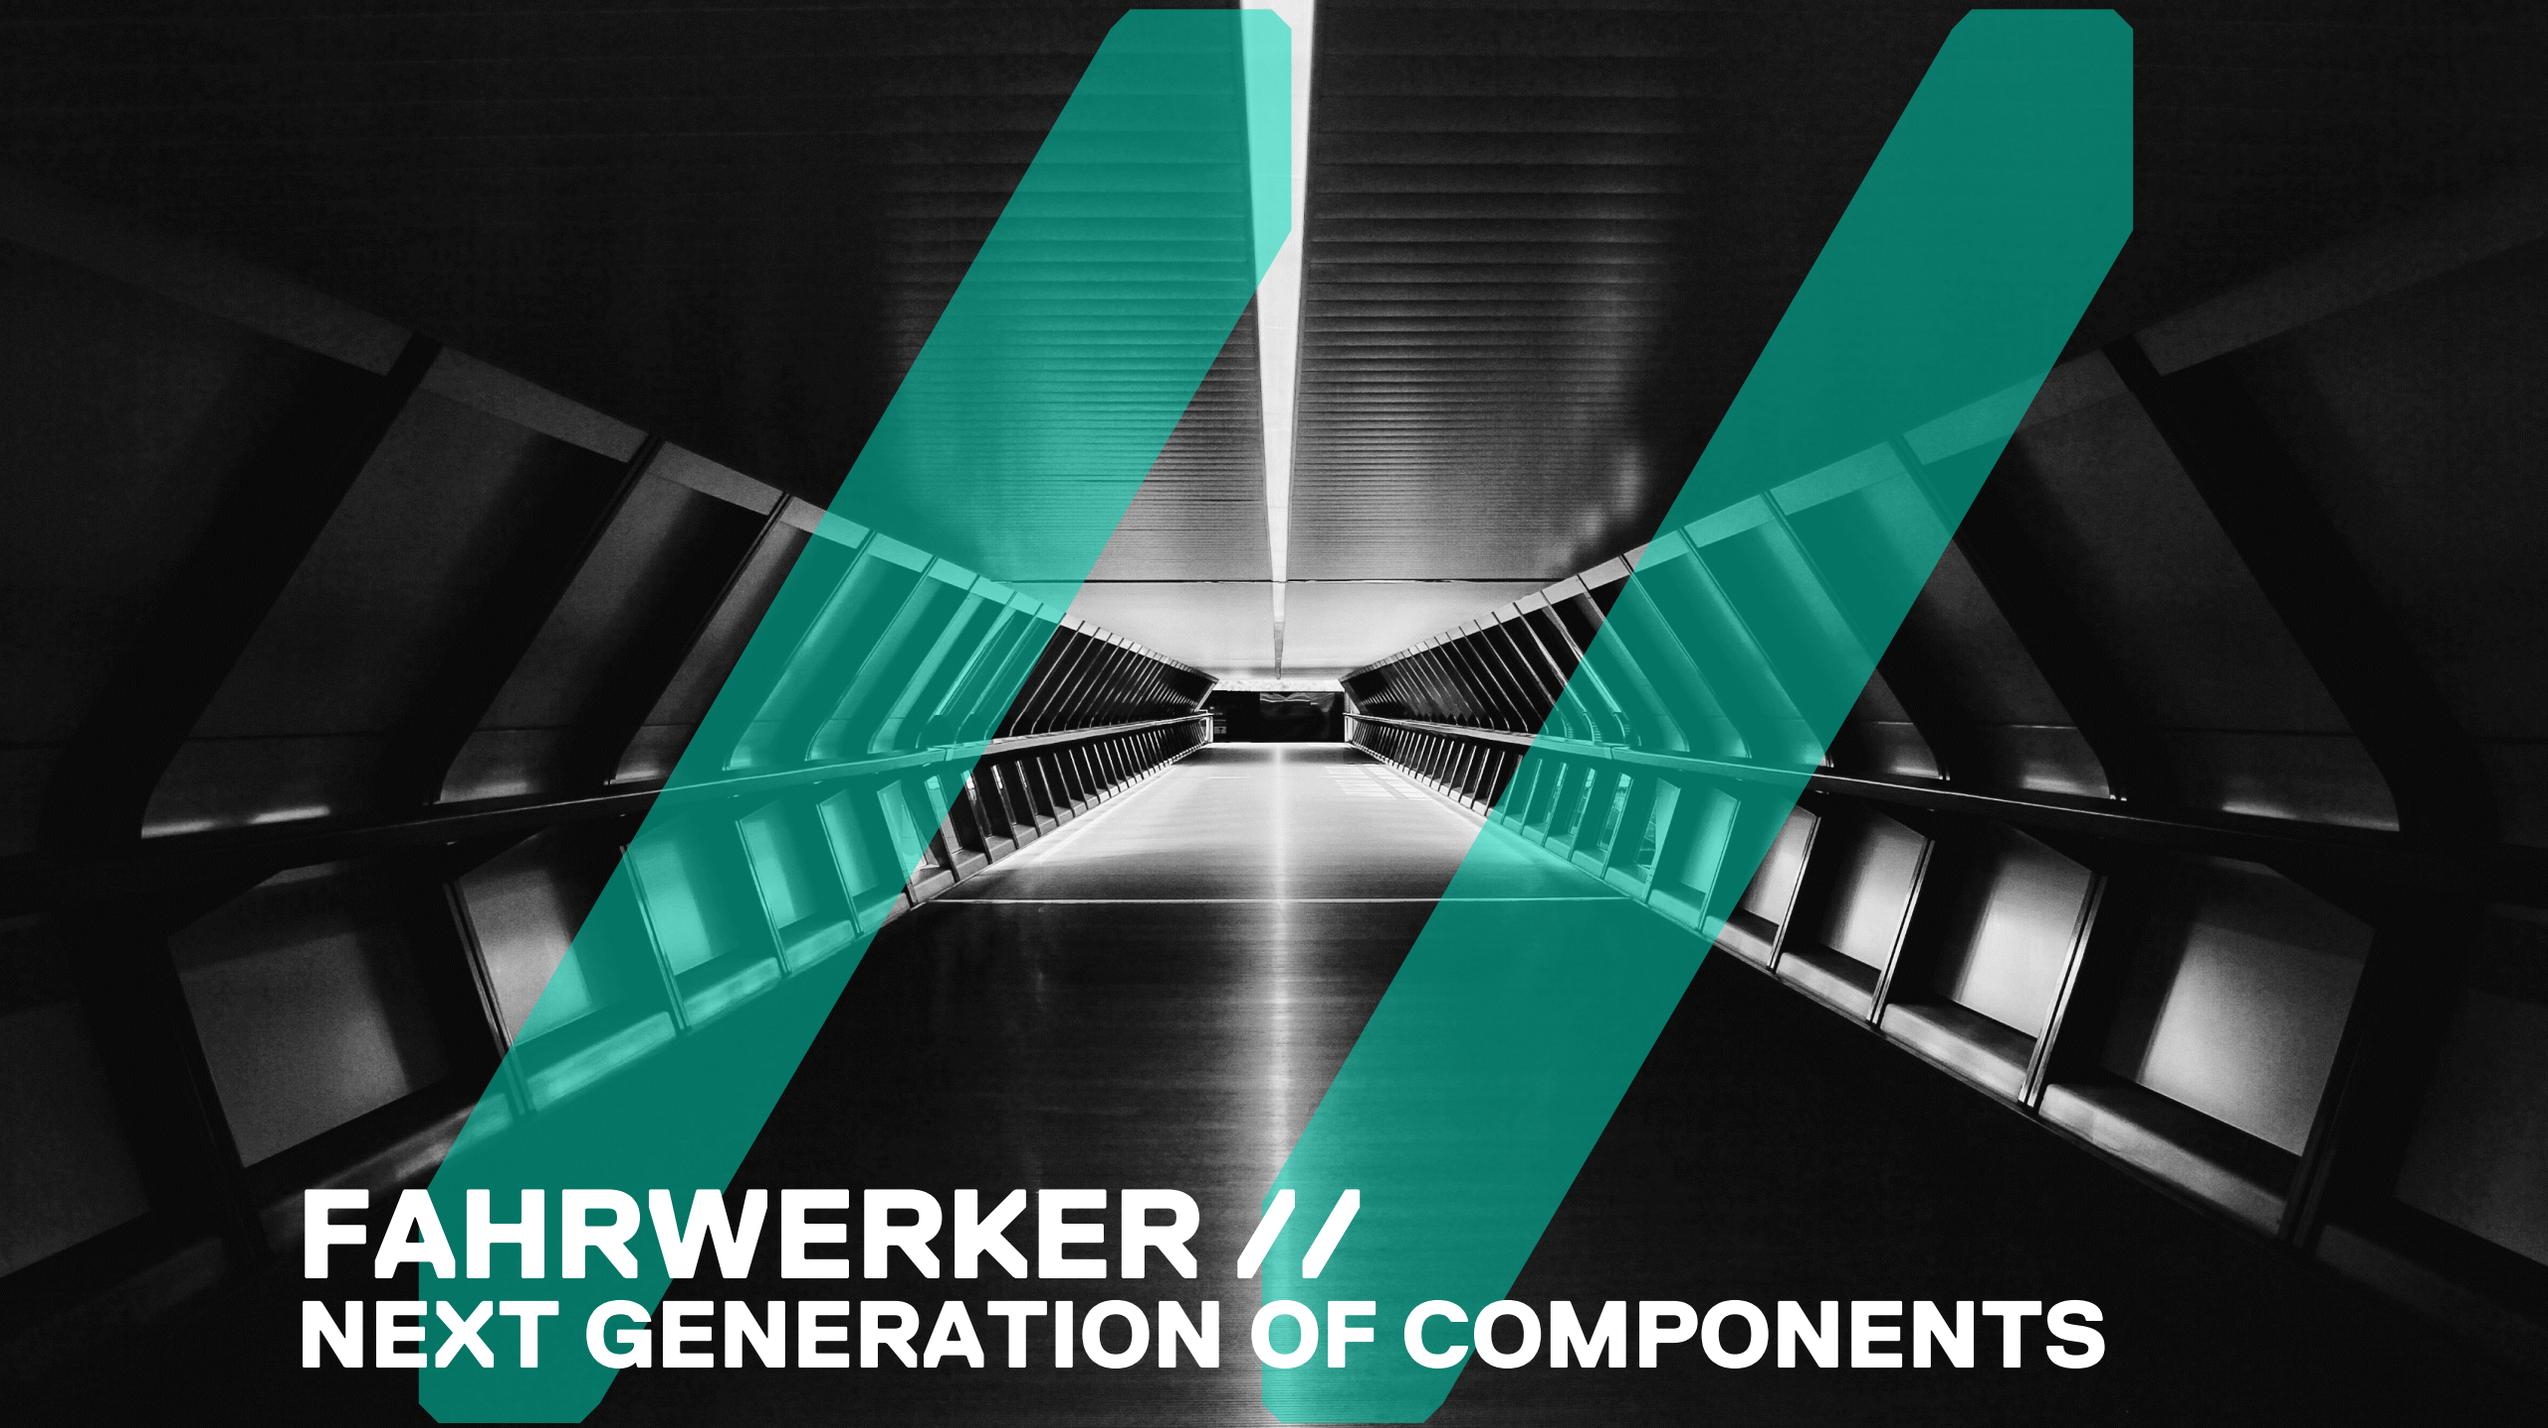

4-bolt bc-100mm

6-bolt bc-72,25mm

and many more....
