

# LINKA

LOCK **SMARTER**, NOT HARDER

# LINKA

LINKA is a powerful bike lock you can mount to your frame, designed and built for the everyday cyclist.

Lock your bike with the tap of a button. Auto-unlock as you approach. Be alerted when somebody tampers with your bike. Log and archive your activity.

All you need to do is pair LINKA Lock with your smartphone and you're ready to go - keyless, convenient, quick and easy.

LOCK **SMARTER**, NOT HARDER.

## KEY BENEFITS

### Go Keyless

Control your lock securely through the LINKA App on your smartphone. You may also unlock LINKA manually by entering your pass code directly on the lock

### Receive Tamper Alerts

Be alerted of suspicious activities up to 120 m (400 ft) away through the LINKA App and the lock's 110+ dB built-in siren

### Log Your Activity

The LINKA App logs and archives your activity - a useful function for your insurance

### Unlock Automatically

LINKA recognizes your smartphone from within a radius of 2m (6ft) and automatically unlocks your bike as you approach

## Mobile Platform Compatibility

Apple iOS 8+  
Android 4.0+

## TECHNICAL SPECIFICATIONS

### Battery & Power

- Battery life: Up to 16 months depending on usage
- Battery type: Lithion-Ion Polymer
- Rechargeable via Micro-USB 2.0
- Charging duration: 3 hours
- Power Modes are customizable to your needs

### Wireless Communication

- Custom-designed wireless antenna exclusively engineered to achieve maximum range
- Long-range Bluetooth 4.0

- Water-resistant up to IP56 standards

Also available  
in silver

Weight: 635 g (1.4 lbs)

## FAQs

### ***What happens if the locking ring interferes with the wheel's spokes while closing?***

The lock has an interference sensor, so if the ring touches the spoke it automatically retracts, emits an audible alert and sends the owner a notification.

### ***Can I open the lock without my smartphone?***

You may still open the lock without your smartphone by entering the customized 4-digit passcode stored in the LINKA App onto the lock.

### ***Can I manually disable the auto-unlock function?***

Yes - simply toggle the Auto-Unlock button to "OFF" on the LINKA App if you want your bike to remain locked as you approach it.

### ***What happens if the battery dies while the bike is still locked?***

An early warning notification will be sent to the owner once the battery level is below 30%. Moreover, LINKA will not lock below 10% battery charge to ensure you do not get stranded.
